

Transform Work with Nymbly's AI Notes

Introducing **AI Notes** from Nymbly: Powered by advanced machine learning, AI Notes streamlines your workflow, reduces manual effort, and ensures every detail is captured with precision. Smarter and faster than ever before, it's designed to save you time and keep you focused on what matters most. Once you try it, you'll see:

It's hard to imagine going back to the old way.

Key Market Differentiators

Save Time & Increase Productivity

Clinicians can save an estimated one day per week of their time on patient notes. With less paperwork, clinicians can see more patients and improve overall productivity in their space.

Enhance Accuracy

AI Notes ensures more accurate notes of a patient visit. With a patient interaction recording, an intelligent transcript, and an automatically generated summary, clinicians can quickly double-check for errors.

Improve Patient Care

With more time for patient interaction and more focus on the patient during the interaction, clinicians can focus on quality interactions and make better-informed clinical decisions.

Improve Security & Compliance

You can manage access, ensuring notes are only viewed and edited by appropriate recipients; clinicians' structured summaries can easily be converted into templates for audit compliance.

Automated Transcription

Record patient visits in Nymbly and convert audio into structured text in minutes, saving hours of manual documentation a day. Alternatively, upload recordings from other devices to use in the same way.

Healthcare Language

With AWS HealthScribe in AI Notes, you can be confident that your transcriptions accurately summarize secure, private PHI and HIPAA-compliant data, and *keep it that way*.
